

CEDRIA Wood Restorer

Garden Range

Product Description

Powerful wood cleaner and restorer of the natural colour of wood. It returns the splendour to spotted woods or greyish by the effect of the atmospheric agents, UV rays, rain, pollution and dirt in general.
Colourless. Water-based.

Properties

- Removes stains associated with weathering, mould, oxidation, vegetation and tannins both in hard and soft woods (Conifers, hardwoods and tropical)
- Facilitates the restoration of wood
- High Performance
- Does not alter the natural colour of the wood

Recommended Uses

Recommended for the restoration of wood before the application of all types of wood stain or oils. Excellent degreaser for hard woods with high content of oils or extracts.
Other surfaces: stone, plastic

Technical Characteristics

Odour	Low odour
Density (20°C)	1.09 kg/l
Solvent Type	Water
Drying	30 minutes
Application Conditions	Maximum Relative Humidity 65%. Temperature between 5° and 35°
Storage	Conserve inside at temperatures between 5°C and 35°C
Container sizes	1l and 5l
Utensils and Cleaning	Paintbrush and scrubbing brush. Clean with water
Coverage	10 m ² /l depending on state of surface and wood type

Safety

- All current legislation must be followed in the case of storage and handling.
- Storage Life: 2 years in sealed containers and at storage conditions as recommended in the Technical Characteristics section.
- Prevent the product or product residues coming into contact with water courses. Remember: the care and protection of the environment is the legacy for our future generations.
- Keep out of the reach of children.

Application

- The wood must be free from dust and grease.
- Product is ready to use.
- Stir (do not shake) the product using a spatula.
- Apply CEDRIA WOOD RESTORER liberally with a paintbrush on slightly damp wood and leave to work for approximately 30 minutes. The wearing of protective gloves and glasses is recommended while applying the product.
- Clean the wood with plenty of water using a scrubbing brush, ensuring that all traces of the product have been deeply removed.
- Leave the surface to dry sufficiently before applying the finish. In the case of stubborn stains, repeat the operation using a scrubbing brush or scouring pad working in the direction of the wood grain.

Additional Recommendations

- Drying times will vary according to temperature and relative humidity.
- The performance and behaviour of the product may vary depending on the type of wood.

Quality Guarantee

CEDRIA products have been developed, manufactured and sold under the most rigorous quality standards. These recommendations are made in accordance with the current state of our knowledge and provide general information about the application and use of the products. Given the variety of substrates, uses and application techniques, the purchaser/user remains responsible for checking the materials, their application and the final result. For this reason, the purchaser/user is advised to test the product prior to the final application.
